

UFOV[®] HARDWARE SPECIFICATIONS
Windows version 6.x.x

The following are the hardware specifications for the windows version of the UFOV[®] software:

1. Windows XP operating system
2. Minimum of 16 MB video card
3. 128 MB of RAM
4. At least a Pentium I processor operating at a minimum of 300 MHZ
5. A 17 inch monitor
6. 4 MB of hard disk space
7. THE DEFAULT LANGUAGE MUST BE SET TO ENGLISH.
8. The user must have administrator privileges.

Please note that this is specialized software that must precisely control the computer's cpu. It is recommended that the software only be installed on a dedicated PC.

To date, the only touch screen monitors that we have confirmed compatibility with the windows version UFOV[®] software are manufactured by Elo Touch systems. We recommend their 17 inch lcd monitor (model 1715L). They can be purchased through Elo Touch System's manufacturer representative:

Elo TouchSystems
6500 Kaiser Dr.
Fremont, CA 94538
1-800 ELO-TOUCH (1-800-356-8682)
WEB site: www.elotouch.com

Note: The only laptops that we have successfully tested with the UFOV software are the Dell Inspirion and Latitude.
